50X1-HUM

How is it that in our country, the birthplace of stereophotography, the production of domestic stereophotographic apparatus and its accessories has not been started? During the years of the Stalin Five-Year Plans, we have developed a large-scale photographic industry and stereo-movies.

It seems to me that stereophotography, especially in color, should be widely popularized. Mass production of stereophotographic apparatus and its appurtenances should be initiated. Photographic materials of the proper size should be manufactured, particularly reversible photographic film for color stereophotography.

Stereophotographic apparatus is doubly valuable, since it is suitable also for the production of ordinary pictures. All conditions necessary for developing domestic stereophotography should be provided. -- O. Skvortsov, an amateur photographer

PLANT REMODELS N. PS -- Moscow, Vechernyaya Moskva, 13 Dec 50

Great changes have taken place at the Moscow Manometr Plant. Equipment has been more efficiently arranged so as to make possible an increase in labor productivity.

The galvanizing shop has been remodeled. Electric panels, baths, and blowers are now in a light and spacious area set off by a lacquered partition.

The shop has introduced technical innovations. Electrical polishing of brass items has made possible the mechanization of labor-consuming manual operations, and the saving of many thousands of rubles.

MAKES INSTRUMENTS FOR NEW HYDROELECTRIC STATION -- Moscow, Vechernyaya Moskva, 27 Nov 50

This year, the Moscow Instruments Plant produced twice as much output as in 1949. During the past 2 years, the production of instruments increased four times, with the use of the same space and equipment.

The plant has completed an order for various types of instruments which it produced for the Kuybyshev Hydroelectric Station on the Volga.

DEVELOP NEW MEASURING INSTRUMENT -- Leningradskaya Pravda, 4 Nov 50

A new type of instrument for measuring the temperature in drying cylinders in paper-making machines has been designed by a worker at the Gosnak Factory.

LIQUIDATE ACCOUNTING DEPARTMENT -- Moscow, Moskovskaya Pravda, 15 Nov 50

Chaspromsnab, the supply cost-accounting department of the Main Administration for the Production of Watches, of the Ministry of Machine and Instrument Building, is hereby liquidated. Claims against the organization must be entered by 20 November 1950. Address Moscow, Golovanovskiy Pereulok, Dom 42-a. -- Advertisement
